

AMENDMENTS

1. – 21. Cancelled.

22. (Currently Amended) A mobile workstation for use with a computer network, comprising:

- a computing device operable for processing data;
- a radio transceiver connected to the computing device operable for receiving and sending data to the computer network through a radio frequency communication channel;
- an input device for entering data into the computing device;
- a tiltable display screen operable for viewing data in the computing device;
- a power unit operable for supplying power to the computing device and the display screen; ~~and~~
- a wheeled chassis for mounting the computing device, the radio transceiver, the input device, the display screen, and the power unit; and
- a medical device, the medical device supported about the wheeled chassis.

23. (Original) The mobile workstation of Claim 22, wherein the power unit further comprises:

- a rechargeable battery for supplying power to the device; and
- a battery charger connectable to an AC power source for charging the rechargeable battery.

24. (Original) The mobile workstation of Claim 23, wherein the power unit further comprises:

a power cord for connection the battery charger to the AC power source; and

a power cord storage assembly operable for retracting the power cord when the power cord is not connected to the AC power source.

25 - 45. Cancelled.

46. (Previously presented) The mobile workstation of Claim 22, further comprising a monitoring device, the monitoring device supported about the wheeled chassis.

47. (Cancelled) The mobile workstation of Claim 22 further comprising a medical device, the medical device supported about the wheeled chassis.

48. (Previously presented) The mobile workstation of Claim 22, further comprising a work surface, the work surface supported about the wheeled chassis.

49. (Previously presented) The mobile workstation of Claim 48, further comprising a storage area positioned beneath the work surface.

50. (Previously presented) A mobile workstation, comprising:
a moveable chassis;
a tray supported by the chassis and having an upper surface defining a substantially horizontal work surface; and
a docking station for a computing device supported by the tray,
wherein the docking station is tiltable relative to the upper surface of the tray.

51. (Previously presented) The mobile workstation of Claim 50, wherein the tray has a lower surface, further comprising:
an input device tray proximate to the lower surface of the tray.

52. (Previously presented) The mobile workstation of Claim 51, wherein the input device tray is a pull-out tray.

53. (Previously presented) The mobile workstation of Claim 51, wherein the input device tray is an adjustable tray.

54. (Previously presented) The mobile workstation of Claim 51, wherein the input device tray is a height adjustable tray.

55. (Previously presented) The mobile workstation of Claim 50, further comprising:
a power unit supported by the chassis for supplying power to the computing device.

56. (Previously presented) The mobile workstation of Claim 50, further comprising a
monitoring device, the monitoring device supported about the moveable chassis.

57. (Previously presented) The mobile workstation of Claim 50, further comprising a
medical device, the medical device supported about the moveable chassis.

58. (New) The mobile workstation of Claim 22, wherein the medical device comprises an
ultra-sound device.

59. (New) The mobile workstation of Claim 22, wherein the tiltable display is used to
view medical images.

60. (New) The mobile workstation of Claim 50, further comprising a tiltable display,
wherein the tiltable display is used to view medical images.

61. (New) The mobile workstation of Claim 22, wherein the power unit is monitored by
the computing device.

62. (New) The mobile workstation of Claim 55, wherein the power unit is monitored by
the computing device.
